

Wolves

Rise Against

Light up the torches and wake up the King
The smoke you've ignored is a flame you can't contain

We circle the walls and claw at the dirt
We growl from our guts and howl until it hurts

I told her come with me
And I can take you from this place now
Somewhere these roads all go
Someplace so we can start again
I grabbed her hand and pulled her close
She looked at me and said
"Hey I don't even know
Your name"

"But are you ready to explode?
Like a tiger in a circus?
Cracking whips are all I know
And searching for a sense of purpose"

We are the wolves at the gates
Our numbers growing every day, now
But you can't fight us alone no
No, you can't fight

We are the wolves at the wall
We break in like a waterfall, yeah
But you can't fight us alone no
No you can't fight

The water is breaching the walls of the dam
Trampling dreams in a rush to higher land

Are you ready to explode
Like a tiger in a circus?
This cage is all I've ever known
But now you've given me a purpose

We are the wolves at the gates
Our numbers growing every day, now
But you can't fight us alone no
No, you can't fight

We are the wolves at the wall
We break in like a waterfall, yeah
But you can't fight us alone no
We are the

We are the....

Roaming in numbers
And chasing the scent
Circling in for the kill
And you are the winter
The long discontent
We won't stop till we've had our fill

(We are the wolves)
Roaming in numbers and chasing the scent
(We are the wolves)
Circling in for the kill
(We are the wolves)
And you are the winter, the long discontent
(We are the wolves)
We won't stop till we've had our fill

We are the wolves!

We are the wolves!

We are the wolves!
