## **Now Comes the Night**

When the hour is upon us And our beauty surely gone No you will not be forgotten No you will not be alone

And when the day has all but ended And our echo starts to fade No you will not be alone then And you will not be afraid No you will not be afraid

When the fog has finally lifted From my cold and tired brow No I will not leave you crying And I will not let you down No I will not let you down I will not let you down

Now comes the night Feel it fading away And the soul underneath Is it all that remains So jus slide over here Leave your fear in the fray Let us hold to each other Till the end of our days
