

## Complex By Degree

Robert DeLong

And it's not fire that made us different  
And it's not logic that made us different  
And it's not talk that made us different  
And it's not sentience that made us different

We are complex by degree (9x)

And it's not god that made us different  
And it's not a soul that made us different  
And it's not killing that made us different  
And it's not love that made us different (5x)

And I am a human  
And I am an animal  
And I am primal and refined by time

dadadada...dadadada...

We are complex by degree (4x)
