Love's A Word I Never Throw Around

Robert Earl Keen

I guess we've come full circle We're strangers once again It's hard to know we'd ever come to this It's funny you were saying how you'd miss The good ole times While all alone I'm thinking You're the one I'll miss

Love's a word I never throw around So when I say I love you till the end I'm talking about till the day they toss me in the ground Love's a word I never throw around

I'd like to think you're leaving Because I've treated you unkind But maybe you've found somebody new Hell, I know the only reason you're leaving me behind Is you're no longer feeling the way I feel for you

Love's a word I never throw around So when I say I love you till the end I'm talking about till the day they toss me in the ground Love's a word I never throw around

So I'm going to the country To spend some time out in the woods Countin' stars and sleepin' all alone I can't say for certain that It'll do me any good But it's time I grew accustomed to being on my own

Love's a word I never throw around So when I say I love you till the end I'm talking about till the day they toss me in the ground Love's a word I never throw around
