What Can You Bring Me

Robert Palmer

When your lovin' is gone And you can't carry on What can you bring me When there ain't nobody else And you can't help yourself What can you bring me What can you bring me

Can you bring me that happy day Let me know that everything is ok Bring it strong and bring it fast Bring it till the pain is in the past

What can you bring me, that'll unchain me What can you bring me What can you bring me baby What can you bring me

Like a man whose on that road Drivin' hard towards his goal Like I'm on my last go round My love life's lost and can't be found What can you bring me

What can you bring me

Hurry baby, don't waste time I need somebody, help me solve this crime Bring it strong and bring it fast Bring it till the pain is in the past

What can you bring me, that'll unchain me What can you bring me What can you bring me

What can you bring me What can you bring me What can you bring me

Help my equilibrium baby

What can you bring me What can you bring me What can you bring me

What can you bring me
