

# Come Into My Life

Robert Plant

Hopes drift in higher places - it's easier above the gloom  
Among the hollow faces, I know you're there - it must be soon  
And I must straighten up - review my disposition  
Pour the hope back in my eyes I thought I'd lost so long ago

Come into my life - here where nothing matters  
Come into my life and roll away the gloom  
Come into my life - here where nothing matters  
Come into my life and roll away the gloom

Always a love and beauty - a lover's sighs content too soon  
Somewhere behind her heartbeat a breath of kindness hints of gloom  
So I must straighten up - review my disposition  
Pour the hope back in my eyes I thought I'd lost so long ago

Come into my life

Oh when you get there - you know I wanna be there  
When you get there - well, you know I wanna be there  
I wanna be there - I wanna be there

Come into my life

Hopes drift in higher places - it's easier above the ground you know  
Hopes are drifting - hearts been lifting  
Somebody somewhere no, done you wrong - I don't know  
Come on, come on, come on, baby  
Come on, come on, come on, baby
