

Fat Lip

Robert Plant

I can't believe it, it happens each day
It's ill conceived, just throw it away
To watch the waitin' time slippin' away
It won't be long now

I hold the moment, the hour is sublime
It's hard believin', dancin' with time
To watch the waiting time slippin' away
It won't be long now

Down at the landing when the boats come in
People stand in line
Close by the water where the fishes swim
Round and round to pass the time

But you know it's gonna get there
Around and around it's gonna spin

Out at the airport where the planes come in
People buzzin' like flies
Out at the airport where the planes come in
See the hours go flashin' by

But you know it's gonna get there
Around and around it's gonna spin

Down at the station where the trains come in
Never make it on time
Down at the station where the trains come in
See my friends all walk the line

But you know they're gonna get there
Around and around they're gonna spin

View it all with suspicion, view it all and despise
View it all with suspicion, view it all with my eyes
