

For What It's Worth

Robert Plant

Something happening here
What it is ain't exactly clear
There's a man with a gun over there
He's telling me, I've got to beware

Stop, yeah, what's that sound?
Everybody look, what's going down
Stop, yeah, what's that sound?
Everybody knows what's going down

Paranoia, striking deep
Into your mind, it will creep
Hits you when you're all alone
I'm crying, baby, baby, please come home, yeah

Stop, yeah, what's that sound?
Everybody look, what's going down
Stop, yeah, what's that sound?
Everybody look, what's going down

When the black days have come
I said, "Nobody's right, everyone's wrong"
The people are losing their mind
Say now, baby, baby, baby, it's sure unkind

Stop, yeah, what's that sound?
Everybody look, what's going down
Stop, yeah, what's that sound?
Everybody look, what's going down

When the black days have come
You know that nobody's right, everyone is wrong
The people are losing their mind
Watch out, baby, I'm sure you're gonna die, yeah, yeah

Stop, yeah, what's that sound?
Everybody look, what's going down
Stop, yeah, what's that sound?
Everybody look, what's going down

Stop, yeah, what's that sound?
Everybody look, what's going down
Stop, yeah, what's that sound?
Everybody look, what's going down
