

# I Cried

Robert Plant

I cried, babe - oh, I cried  
I saw you in a movie - or was it on my wall  
I never dreamed you'd talk to me - I never dreamed at all

You fitted very strongly - you might have changed my life  
Oh, I was very young then - you came along just right  
This is what I cried  
Now you know I cried

I walked the stellar ceiling - my feet were off the ground  
You talked of something permanent when Saturday comes round  
This is what I cried  
This is why I cried  
This is what I cried  
Now you know I cried

Kisses gone crazy - come on, tease me 'till I scream  
Promise is a maybe, running through my dream  
It's what I hear you whisper, soft across my room  
Chase my whole confusion - wrest me from my gloom  
This is what I cried  
Now you know I cried

Your eyes are where the summer lives in pools of quiet fire  
Come mess with my sincerity - go down on my desire  
I feast on your expression - the smile that tells it all  
On my mind forever - forever on my wall  
This is what I cried  
Now you know I cried  
This is what I cried  
This is what I cried
