## **Summertime**

## **Roberta Flack**

Summertime when will you come? I wanna put my light things on I wanna put my winter life away Summertime I need a sunny day

I want those peaches on the table
Want the watermelon red
And the warm sun crepping through the window
To ease the outer pain

I want the sand out there to lie on And the sea out there to swim So my heart can take a holiday From breaking over here

Summertime when will you come? I wanna put my light things on Wanna put my winter life away Summertime I need a sunny day

And I wanna it dry forever Wanna roll those windows down Get the breeze back on my body Get my feet back on the ground

I want the sand out there to lie on And the sea out there to swim So my heart can take a holiday From breaking over here

Summertime when will you come? I wanna put my light things on I wanna put my winter life away Summertime I need a sunny day
