

# Out Of The Picture

Robyn Hitchcock

Don't you ever wonder 'bout the nowhere girl  
Don't you feel sad or feel strange  
There is no escaping from the nowhere girl  
She's never really truly out of range  
And I'm walking out of the picture  
Leaving everything behind except my mind

Don't you feel temptation for the nowhere girl  
She can burn your hands and sting your heart  
She knows it's too late for you to save the world  
And you believe that there's still time to start  
And I'm walking out of the picture  
Leaving everything behind except your mind

She's not just a pretty face  
She's a big black hole as well  
She swallows everything she sees  
She's not of the human race  
She's a creature out of hell  
She's a disease

You are just in time to see the nowhere girl  
Settling her fingers 'round your brain  
Saw away the taps and you're a brand new world  
You'll never ever pass this way again  
Walking out of the picture  
Leaving everything behind except your mind
