

What Waited For Me

Rocky Votolato

I could have been there for you
Like you needed me to
Vision showed me the truth
When my eyes closed for good

Lost in latent darkness
Beneath good humor and violent outbursts
With each new explosion
sending shrapnel in every direction

Life and death are just false shadows
That flicker in my mortal memory
To the one true light, I was lost and blind
But now I finally see what waited for me

Now I'll be here for you
Like you needed me to
A flipbook character
I won't move unless you turn the pages

Life and death are just false shadows
That flicker in my mortal memory
To the one true light, I was lost and blind
But now I finally see what waited for me
