

## Love To Burn

Rodney Crowell

You know I love you baby you know I need you too  
The life I lead is all I need to make my dreams come true  
It was a July night in Houston when first I felt your heat  
Girl you look so fine in that jukebox line that I forgot I had  
two left feet  
You know I want you baby you know I need you so  
The love you make gives me the shakes from my head down to my toes  
Your love is something smoking your love is something hot  
When I feel the storm rolling in your arms I'm gonna give you everything I've got  
Every beat of your heart is like a bolt of blue lightning  
You heat up the night like a hot summer wind  
The taste of your lips just sets me on fire  
Everywhere I turn got love to burn again  
I love to please you baby and smell your sweet perfume  
The way you walk and the way you talk just keeps me on the moon  
Your love is high explosive there's dynamite in blue jeans  
Anytime you choose to light that fuse you're gonna blow us all  
to smithereens  
Every beat of your heart  
Everywhere I turn got love to burn again  
Everywhere I turn got love to burn again
