

## Good Morning

## Rogue Wave

The future isn't what it used to be  
I'm not surprised  
I'm not surprised  
Do you think that we like to take our orders from fools?  
They're so behind  
They're so behind

So they ordered up a love machine  
Directions to your house were demanding  
Now I've got security  
I long to let your hair fall around me  
Fall around me

To me  
It always is, always assigned to me  
Your love  
Always is, always assigned to me  
Your love  
Always is, always assigned to me  
Your love  
Always is, always assigned  
To me

The future isn't what it used to be  
I'm not surprised  
I'm not surprised  
Most of us live on boats of luxury  
We're so confined  
We're so confined

You know that I was born so late  
You know that they've been late all around me  
All around me

To me  
It always is, always assigned to me  
Your love  
Always is, always assigned to me  
Your love  
Always is, always assigned  
To me

The future  
The future (oh, oh, oh)  
The future  
The future (oh, oh, oh)

So they ordered up a love machine  
Directions to your house were demanding  
Now I've got security  
I long to let your hair fall around me  
Fall around me

To me  
It always is, always assigned to me  
Your love  
Always is, always assigned to me

Your love  
Always is, always assigned  
To me  
To me

The future (oh, oh, oh)  
The future
