Well these bottles and stones We collected from our shows We could line them one by one Cause your pain is my pain We'll go out of this just the same We're better when our paths combine I nearly drove past the sign I'll never leave you I'll never be like that I'll be the one I was in life I'll never leave you I'll never be like that I'll be the one I was in life Attached, she's born Even when I'm tired and worn Her father's window's first daylight Well the past is just dead A thousand monkeys in my bed The only thing I have is time To bring back this bloodline of mine I'll never leave you I'll never be like that I'll be the one I was in life I'll never leave you I'll never be like that I'll be the one I was in life I'll never leave you I'll never be like that I'll be the one I was in life I'll never leave you I'll never be like that I'll be the one I was in life I was in life, yeah
