

Right With You

Rogue Wave

Light the force that's on my back
Can't get right with you
Light the force that's on my back
Can't get right with you
I push down to win
But it isn't too important
Light the force that's on my back
Can't get right with you

Roll my head down again, bring back some more
Roll my head down again, just like before
Roll my head down again, bring back some more

Imitation pearl
Genuine rhinestone
I can't wait to push down for some more

Light the force that's on my back
Can't get right with you
You're lying down I'm getting up
Can't get right with you
You're coming down I'm getting high
Can't get right with you
Light the force that's on my back
Can't get right with you

Roll my head down again, bring back some more
Roll my head down again, just like before
Roll my head down again, bring back some more

It's so obvious
You're just a temptress
It's what neurosis is
But we're running out of time
We're running out of time
We're running out of time
Can't keep myself in line

Millions of creatures could open my eyes
So hold my head down again, please
Oh, roll my head down again, bring back some more
Roll my head down again, just like before
Roll my head down again, bring back some more
