

Before In The Beginning

Roky Erickson

Before in the beginning there was man
Before in the beginning there was man
Before in the beginning there was man
There is woman

Before in the beginning there was light
Before in the beginning there was light
Before in the beginning there was light
Still bright

Modern science turned down reality for industry
If before in the beginning there was light
If before in the beginning there was light
If before in the beginning there was light
Leave it

Sing this song all together
Tap your toe and see what happens

Once you sing this song
They won't know what you're talking about
Once you sing this song
They won't know what you're talking about
Once you sing this song
They won't know
Believe

Know one
The first one
No one won
Know one
The first one
No one won
Know one
The first one
No one won
Is itself

Before in the beginning there was man
Before in the beginning there was man
Before in the beginning there was man
There is woman
