Come Be My Baby

Ronan Keating

Come be my baby
Please come be my baby now
Can we just make love
Trust me let me show you how

You and me we got the perfect chemistry
And what it is will always be a mystery
Sometimes we fight but then we'll have the greatest night
And all I know is you ain't getting out of my sight

Don't worry baby lets get inside
There's something about you that gets me every time
I ain't gonna lose you because I love you too too much
I'd die for just one touch

Come be my baby
Please come be my baby now
Can we just make love
Trust me let me show you how

No time for maybe
Please come be my baby now
And baby stop running away

You and I have got the perfect alibi
To always touch and never ask the question why
We're still here and do it till we cry
I give my life and I never tell a lie

Don't worry baby because I'm you're guy
There's something about you that gets me every time
I ain't gonna lose you cause I love you too too much
I'd die for just one touch

Come be my baby
Please come be my baby now
Can we just make love
Trust me let me show you how

No time for maybe
Please come be my baby now
And baby stop running away

My baby stop running away
My baby stop running away

Don't change (14x)

Come around
Because I'm on the ground

Come be my baby
Please come be my baby now
Can we just make love
Trust me let me show you how
No time for maybe
Please come be my baby now

My baby stop running away

I can feel you come
You got to come around
And get me off the ground

You got to come around
And get me off the ground
