So Easy Lovin' You

Ronan Keating

Standing here in front of you You never looked so beautiful With every breath you steal my words away It's like seeing you the first time Yeah that's the way I feel tonight In you I've found a place I wanna stay Wish I could freeze you in this moment like a photograph You're the life I always wanted but never dreamed I could have

It's so easy loving you To trust you with my heart There's nothing else I wanna do It's so easy loving you

With you I feel I could touch the sky I don't have to climb that high To see that you're the better part of me Wish I could freeze a moment and take you away To a place somewhere only we could be

It's so easy loving you To trust you with my heart There's nothing else I wanna do Just being next to you You're the final piece that fits You're the smile I can't resist For everything you brought me through and everything you'll eve r do It's so easy loving you

I'm not searching or hoping for anything new There's nobody could love me the way that you do

It's so easy loving you To trust you with my heart There's nothing else I wanna do Just being next to you You're the final piece that fits You're the smile I can't resist For everything you brought me through and everything you'll eve r do It's so easy loving you

It's so easy loving you You make it easy loving you It's so easy loving you
