

What Is Love

Rookie of the Year

Crazy
Maybe
If it bugs me
Someday
And I never want to be the one to fall, to make you fall away
you keep on pressure me, pressure me and bring me down
but I don't know when to stop
What is love, What is love
She's been searching for rainbows
What is love
I go where ever the wind blows
What is love
Someone I can talk to every night
Someone I can talk to every night
The city
Party
A Taxi
I'm leaving
And I never want to be the one to fall, to make you fall away
you keep on pressure me, pressure me and bring me down
but I don't know when to stop
What is love, What is love
She's been searching for rainbows
What is love
I go where ever the wind blows
What is love
Someone I can talk to every night
Someone I can talk to every night
Do you feel in love?
Would you feel in love if the pressure makes us?
Do you feel in love?
Would you feel in love if the pressure makes us?
Because it's you, you, you
You fit me perfectly
It's always me me me
Cast into the sea
If we can see this through
In perfect symmetry
It was love
What is love, What is love
She's been searching for rainbows
What is love
I go where ever the wind blows
What is love
Someone I can talk to every night
Someone I can talk to every night
What is love, What is love
She's been searching for rainbows
What is love
I go where ever the wind blows
What is love
Someone I can talk to every night
Someone I can talk to every night
Someone I can talk to every night
Someone I can talk to every night
What is love
