

# What We Really Want

Rosanne Cash

We tried to make ourselves pay  
For something we've never done  
We threw the best parts of life away  
On street talk strangers and drugs  
And what we really want is love  
What we really need is love

I wanna call out your name  
I wanna hold out my hand  
A woman silent in the mirror tonight  
Wants to talk to your mirror man  
And what they really want is love  
And what they really need is love

We are ships in the night  
The water is deep in between  
There is reason and we can't find the light  
So we sail off into our dreams  
And what we really dream is love  
And what we really need is love

What we want is love  
What we need is love

We tried to make it feel right  
In someone else's world  
We sat and looked out my window last night  
And knew that things had changed with this girl  
'Cause what I really found was love  
What we really need is love

What we really want is love  
What we really need is love  
What we want is love  
What we need is love
