

## The Last Time

### Roses Are Red

In this room I learned to love with you  
So in love with you somehow  
I've been alone here all this time  
I've seen the daylight in your eyes  
Through your eyes I learned to see again

In nightfall we are bored  
We wish for something more  
And now with dawn approaching, falling faster than before

Clarity we find in morning light (so come with me tonight)  
Cause this could be the last time you find me drowning in my life (come with me tonight)

It's getting late, the light will fill this room  
I'm through with you for now  
I've been alone here all this time  
Another day has passed me by  
I'm alive until I wake again

In nightfall we are bored  
We wish for something more  
And now with dawn approaching, falling faster than before

Clarity we find in morning light (so come with me tonight)  
Cause this could be the last time you find me drowning in my life (come with me tonight)  
Clarity we find in morning light (so come with me tonight)  
Cause this could be the last time you find me drowning in my life (come with me tonight)

So so long my wishing well  
You found me in this same hell  
So so long my sweetest day  
You took the pain away

Clarity we find in morning light (so come with me tonight)  
Cause this could be the last time you find me drowning in my life (come with me tonight)  
Clarity we find in morning light (so come with me tonight)  
Cause this could be the last time
