

# Come Around

Rosi Golan

So high tonight  
And I don't feel like coming down  
I could lie to you all my days  
But you're the one, you're the one  
And I'm a fool  
For waiting so long to let you know

Come around, come around, come around, come around to me  
There's something in between you and I  
Come around, come around to me  
You feel like breathing  
Come around, come around, come around, come around to me

Like sunlight won't you come  
Lay your ray down, you're the one  
I could run, I could run for the life of me  
But where would that get me?  
Where would that lead?

I'm a fool  
For waiting so long

Come around, come around, come around, come around to me  
There's something in between you and I  
Come around, come around to me  
You feel like breathing  
Come around, come around, come around, come around to me

Can't you see  
You're my life.....life  
Ha ah ah ahhhhhh

Come around, come around, come around, come around to me (2x)

Come around, come around, come around, come around to me  
There's something in between you and I  
Come around, come around to me  
You feel like breathing  
Come around, come around, come around, come around to me

Come around, come around, come around, come around to me (3x)  
Come around.....to me
