

# Shout

Ross Copperman

When did it change  
Was it my fault  
Did I push you away

I, I tried so hard  
But I never knew  
It was falling apart

So now you wanna go  
And just walk away  
Maybe we could try  
Why don't you stay?

Love can bring you down  
It lifts you up  
It turns you around  
Love can make you shout  
It pulls you in  
And spits you out

So, is it too late  
Let's start again  
Go back to that place

We could be stars  
Just you and me  
It won't be that hard

But now you wanna go  
And just walk away  
Maybe we could try  
Why don't you stay?

Love can bring you down  
It lifts you up  
It turns you around  
Love can make you shout  
It pulls you in  
And spits you out

When you're drivin down the road  
And you got no where to go  
You're gonna think of me  
now you're feelin so alone  
Cause there's no one there to hold  
It's all gonna be just fine

'Cause love can bring you down  
It lifts you up  
And turns you around  
Love can make you shout  
It pulls you in  
And spits you out  
(Shout!)

It makes me wanna shout!  
(Shout!)

Oh yeah...  
It makes me wanna shout!  
(Shout!)  
It makes me wanna shout!  
It makes me wanna shout!  
(Shout!)  
Hey...it makes me wanna shout, shout, shout, shout!  
Hey...e on  
(Shout! Shout!)  
It makes me wanna shout, yeah  
It makes me wanna shout  
It makes me wanna shout  
(Shout!)  
It makes me wanna shout  
Singin' it out loud.
