## I Am With You

## Rotersand

I am with you from the day You saw the light and took your mother's breath away I am with you when you fade When your soldier's laying down his blunted blade

Once you'll stay with me I will set you free Forever free from all your worries and your vanity There's no need to fear I will hold you dear In my arms you'll close your eyes for all eternity

I am with you when you laugh With sudden joy that makes you praise the gods above I am with you when you cry When all you ask is why and there is no reply
