## I Cry

Rotersand

Me and you standing eye to eye I read your face, i've known you for so long Torn in two and i don't know why What was right somehow now is wrong I say hey my friend Don't let it end We've got to try, try while we still can I say hey my friend I don't know when But there's a time our sun will rise again What we did, what we said What we missd and what we had I cry i cry over you What we did, what we said What we missd and what we had I cry i cry over you I say hey my friend I say no you can't Walk away, run away like this What we did, what we said What we missd and what we had I cry i cry over you What we did, what we said What we missd and what we had I cry i cry over you What we did, what we said What we missd and what we had I cry i cry over you
