## Loser

## **Rotten Sound**

You put that shit into your veins To end up your private mortal pains It will leave in you some stains No brain, no face and no grace

Or did you really have them at all? Did you leave them at a birth stall? I despise you and the shit you take And all of the mistakes you have ever made!

Give all of us a change And stop taking that fucking nonsense It will leave in you some stains Some brain, some face but still no grace

Or did you really have them at all? Did you leave them at a birth stall? I despise you and the shit you take And all of the mistakes you have ever made!

The loser inside of Of your container Grabbing tighter Chemicals take over (Finding the perfect way to grab tighter Your soul is going to be internally swollen)
