## Terrified

## **Rotten Sound**

A painful awakening Hurting like never before How to process The pressure and stress? How to give everyone More than they can take?

We are terrified to live We are terrified to die

Every single failure Takes us closer to catastrophe Fighting bank is not an option For the servants of "life"

Being a human Is harder again When we have just Woken up another day

Nothing will save us No one can help Because we're the smallest And sickest things alive

We are terrified to live We are terrified to die

A painful awakening Hurting like never before How to process The pressure and stress? How to give everyone More than they can take?

Humanity equals insanity Creating more depravity Leading us to the stupidity Of infinite inhumanity
