

## The Effects

**Rotten Sound**

Every time the wise of mankind  
Ask how to save ourselves  
The inventions are being questioned  
But the root cause is being ignored

Making a less consuming working class in the West  
Won't help us at all when the South doubles the effects  
It's time to affect all the companies that want  
To save money in the East

Taking down this system that grows  
Is the way to go even when the system to kill is protected  
By the greatest armies and the most corrupted leaders  
Taking down this system that grows is the way to go

Making a less consuming working class in the West  
Won't help us at all when the South doubles the effects
