

# True to Life

Roxy Music

So it gets to seven  
And I think of nothing  
But living in darkness  
And the diamond lady  
Well, she's not telling  
Don't even know her name

It's amazing  
Times have changed  
In days of old  
But imagination'll leave you  
Standing out in the cold

Dancing city  
Now you're talking  
But where's your soul?  
You've a thousand faces  
I'll never know

True to life  
True to life

There are complications  
And compensations  
If you know the game  
Agitated in xenon night  
I'll take you home again

Travel way downtown  
In search of nothing  
But the sky at night  
And the diamond lady  
When she's not talking  
It's alright

True to life  
True to life  
True to life

So I turn the pages  
And tell the story  
From town to town  
People tell me  
"Be determined  
Poor country boy"

But too much luck  
And too much trouble  
Much time alone  
But arm in arm  
With my seaside diamond  
I'll soon be home
