I close my eyes
And love so warm and tender
Feel you touching me
I close my eyes
I don't even have to try
It comes so easily
I don't know why
I ever let us drift apart
But look who's sorry now
Cause every time
I wake up and you're not around
It only brings me down

## Oh baby All I can do is dream you All I can do is dream you Oh baby All I can do is dream you All I can do is dream you Everyday I pray

That somewhere down the line
We will meet again
I'll find a way
To get you back somehow
But baby until then

## Oh baby All I can do is dream you All I can do is dream you Oh baby All I can do is dream you All I can do is dream you Everyday I pray
