Coffer cafe's dizzy with city lights, concrete sidewalks busy w ith friendly fights

But that's alright baby, it's alright come go with me and you will see city life, city life

Loud paper boys yelling yesterday's news, a pedlar man selling what you can't use

That's alright baby, it's alright come go with me, you will see city life, city life

I need you when the sun goes down, you pick me up when you're a round

Come on, come on now, we can have a good time, this town ain't much unless you're here with me

It's like a woman, crazy just like a puppy, lazy
Just like a pretty jealous wife, I can't get free from city lif
e

Secluded bars humming behind the scenes, hot wild guitars strum ming, promising dreams

That's alright baby, it's alright come go with me and you will see city life, city life

I don't want to be alone, stay with me now, don't go home It's a date, we'll stay out late and party, city lifes okay whe n you're with me

It's like a lion sleeping just like a willow weeping,
A melting pot for fun and strife can't get away from city life
City life baby, city life, it's alright baby, it's alright city
life, city life....
