

# Dream You

Roy Orbison

I've been away from you for so long  
Still every time I think of us I get blue  
But all I can do is dream you

I close my eyes And love so warm and tender  
Feel you touching me, I close my eyes  
I don't even have to try It comes so easily

I don't know why I ever let us drift apart  
But look who's sorry now Cause every time  
I wake up and you're not around It only brings me down

Oh Baby, All I can do is dream you, All I can do is dream you  
Oh Baby, All I can do is dream you, All I can do is dream you  
Here I go dreaming you

Everyday I pray, That somewhere down the line  
We will meet again, I'll find a way  
To get you back somehow, But baby until then  
Oh Baby, All I can do is dream you, All I can do is dream you
