

Dream You

Roy Orbison

I've been away from you for so long
Still every time I think of us I get blue
But all I can do is dream you

I close my eyes And love so warm and tender
Feel you touching me, I close my eyes
I don't even have to try It comes so easily

I don't know why I ever let us drift apart
But look who's sorry now Cause every time
I wake up and you're not around It only brings me down

Oh Baby, All I can do is dream you, All I can do is dream you
Oh Baby, All I can do is dream you, All I can do is dream you
Here I go dreaming you

Everyday I pray, That somewhere down the line
We will meet again, I'll find a way
To get you back somehow, But baby until then
Oh Baby, All I can do is dream you, All I can do is dream you
