

Forever And Ever

Royal Wood

These two rivers meet
They run together
I will be with you for worse or better
We'll keep traveling as long as the sun lasts
Cause my future met and married your past
When the stars fade to black
I will say
Hey hey hey
I wanna run with you
Hey hey hey
So let them call us fools
Hey hey hey
I'll sing this song to prove
Forever and ever and ever...

Been quiet for so long I didn't notice
Was lonely for someone I didn't know yet
But now we chase the moon to the horizon
And you are still the one I've got my eyes on

How was I to know?
How was I?
How was I?
Where this life would go?
Now forever
