When Nothing's Left

Royal Wood

What is this we find ourselves alone again? Just you and I a force against the gears If nothing's left to burn we must burn ourselves When nothing's left to burn

How is this we find ourselves as two again? Yes you and I a rage against the mirror If nothing's left to say we must speak ourselves When nothing's left to say

How my love this moment here is ripe for us Yes you and I so brave against the years If nothing's left to live we must find a way When nothing's left to live

With all my heart ...

Yes how my love this moment here is ripe for us Yes you and I so brave against the years If nothing's left to live we must find a way There's reason yet to live There's something left to give We must find a way There is so much to give
