

Better Together

Rufus

We thought we could do it without love
Kept tellin' ourselves that here's where it ends
Your way is my way and it's shown
Something that we never admit

In changin' the way I was feeling
Only love and joy makes it right
Feel first, and love lasts forever
I'll do it with you if that's what you like

Better when we do it together
Can't leave it alone
Good things get away

All the other ways we've gone don't matter
Can't leave it alone
Good things get away

Remember when happy was with us
And all his dreams were sung
Such things are forgotten thereafter
'Cause we had to go on with the show

Things, different places, adventure, makin' love
'Cause love was the way
Golden exchange, lots of money
And the best of it all at our feet
