

The Emergency

Run Kid Run

Our poise is set strike, now don't rest
Hesitation can kill the best
The words can not get through
These teeth lock in the truth
They scream of murder at bodies bruised
We gotta get it right, just wanna find out way

Stand up to the urgency
The emergency is why we sing together
One voice, we've made one choice
This is it, this is it, this is who we want to be

Love step in and take the poison that sets in
When silence screams catastrophes, we'll begin the masterpiece
Crisis calls for reaction so let's take this action
Stop hiding 'cause we think it's safer than words
We gotta get it right, just wanna get this right
We gotta find our way back to the light
We gotta get it right, just wanna find our way

Stand up to the urgency
The emergency is why we sing together
One voice, we've made one choice
This is it, this is it, this is who we want to be
We wanna get it right, we wanna find our way
We wanna get it right
Stand up to the urgency
The emergency is why we sing together
One voice, we've made one choice
This is it, this is it, this is who we want to be
This is who we want to be
And I know, I know
