Fight the Oppression

Running Wild

Atomic warheads, weapons of all kind Invented to destroy, to find their victims, to grind Mendacious rulers, ministers of defence Leading you to war, can't you see where it all ends

Total destruction, adversary's death Contamination, epidemics, and fear Bloodshed goes on till the very last breath No remedy if blood feeds the gear Fight the oppression, now Fight the oppression, down

Megalomania, ruler's disease Deceit and treason, your life is what they seize All liberty is dying, to reign is the sense Leading you to war, can't you see where it all ends

Total destruction, adversary's death Contamination, epidemics, and fear Bloodshed goes on till the very last breath No remedy if blood feeds the gear Fight the oppression, now Fight the oppression, down
