

# The Greatest Flame

Runrig

Like shadows on the wall  
You come and you go  
Through the streets  
And the rain that falls down  
On our sin  
No more good-byes  
Forever this way  
Whenever the greatest flame in the world  
Starts burning  
This is our life, and our time  
And nothing, is ever going to break us  
Now we're on our own  
Always in your eyes  
A waking of souls  
We gaze out on the road  
That brought us up  
To this place  
The signposts never change  
We'll go where they lead  
Whenever the day to break us comes  
We'll not give in  
This is our life, and our time  
And nothing, is ever going to break us  
Now we're on our own  
This is our place, in our lives  
And no one can ever change this moment  
Or pull this mountain to the ground  
Live the day when the flame is strong  
Live the day when the flame is strong  
Come the day when love is gone  
Take it over, Take it over  
Live the day when the flame is strong  
Live the day when the flame is strong  
Come the day when love is gone  
Take it over  
This is our life, and our time  
And nothing, is ever going to break us  
Now we're on our own  
This is our place, in our lives  
And no one can ever change this moment  
Or pull this mountain to the ground
