

The Body Electric

Rush

One humanoid escapee
One android on the run
Seeking freedom beneath a lonely desert sun

Trying to change its program
Trying to change the mode -- crack the code
Images conflicting into data overload

One-zero-zero-one-zero-zero-one
SOS
One-zero-zero-one-zero-zero-one
In distress
One-zero-zero-one-zero-zero

Memory banks unloading
Bytes break into bits
Unit One's in trouble and it's scared out of its wits

Guidance systems break down
A struggle to exist
To resist
A pulse of dying power in a clenching plastic fist

One-zero-zero-one-zero-zero-one
SOS
One-zero-zero-one-zero-zero-one
In distress
One-zero-zero-one-zero-zero

It replays each of the days
A hundred years of routines
Bows its head and prays
To the mother of all machines
