

Airplane

Rusted Root

Spread these wings open wide
Open wide to my grave
Spread these wings open wide
Open wide, shed these braves

We only know our love is for you
We only know our love is for you
We only know our love, our love is for you
We only know our love, our love is for you

In the end
You're a page of words laying across the sky
And even the airplanes they gaze away
Ah but they never look down to read what you say

We only know our love is for you
We only know our love is for you
We only know our love, our love is for you
We only know our love, our love is for you

We only know our love, our love is for you
We only know our love, our love is for you
Our love, our love is for you
Our love, our love is for you
