

# Doomsday

Ryan Adams

I could wait a thousand years, my love  
I'd wait for you  
I could stand in just one place, my love  
And never move

As the fire burns around us in the dark  
One part is the world and one's my heart

My love, we can do better than this  
My love, how can you complicate a kiss?  
My love, do you love me now 'til doomsday comes  
'Til doomsday comes

Can you stand and face your fears, my love?  
I will for you  
I could stand in just one place, my love  
And never move

As the fire burns around us in the dark  
One part is the world and one's my heart

My love, we can do better than this  
My love, how can you complicate a kiss?  
My love, do you love me now 'til doomsday comes

My love, oh, and I don't know  
My love, how to let my feelings go  
Do you love me now 'til doomsday comes

'Til doomsday comes  
'Til doomsday comes
