Photo

Ryan Cabrera

A photo can say a thousand things But it can't say the million things I wanna say A photo can capture the way we were But it can't capture the way we are 'Cause you're far away What it's like to know you What it's like to touch you

When you told me that you loved me were those just words You can't tell me you don't need me and I know that hurts 'Cause I'm looking at your picture 'Cause it's all I've got Maybe one day You and me will have one more shot

Timing lost minutes and moments And I might be lonely girl But I'm not afraid In a second It all comes right back to me Nothing's forgotten now Yeah everything's saved What it's like to touch you What it's like to know you

When you told me that you loved me were those just words You can't tell me you don't need me and I know that hurts 'Cause I'm looking at your picture 'Cause it's all I've got Maybe one day You and me will have one more shot

You were my life you were my faith You gave me hope every day

When you told me that you loved me were those just words You can't tell me you don't need me and I know that hurts 'Cause I'm looking at your picture 'Cause it's all I've got Maybe one day You and me will have one more shot
