

October Skies

Ryan Malcolm

As I'm travelling, top down, through the streets of this town,
leave it all behind
Gonna start a new life chase a dream of spotlights, who knows what we'll find
You don't have to be afraid, (as long as I'm with you) we'll make our escape

Everywhere I go, on this open road
I'll always be with you right here by your side
Our love will never die, your colours come alive
Underneath October skies

You threw away your lifeline, got to me just in time, words can't say
If you have found a meaning, love's a season changing, brand new day
You don't have to be afraid, (as long as I'm with you) we'll make our escape

The summer's come and gone, and I know as the leaves are turned to gold,
There will be, a promise that I'll make, to you forever
You don't have to be afraid, (as long as I'm with you) we'll make our escape

[Chorus 2x]
