

I forgot your name by now  
So don't remind me  
Im much better off without  
a love that's blinding  
I'm pissing on your grave  
so nothing's gonna save you now

I forgot your number now  
Its been a long three days  
and one hard lonely hour  
I hope you wish upon a lucky star  
The f\_ck you think you are

I will never believe you  
ever again you  
wish you could stay  
I will never forgive you  
all of your lies don't  
make this okay

I forgot your name by now  
I hope you don't believe  
all that you hear inside  
your lips are full of sh\_t  
you know you're cold  
so do it go and golden

I will never believe you  
ever again you  
wish you could stay  
I will never forgive you  
all of your lies don't  
make this okay

Rising forward  
Dont look back now  
We will be okay

I will never believe you  
ever again you  
wish you could stay  
I will never forgive you  
all of your lies don't  
make this okay

I will never forgive you  
Never forgive you  
Never forgive you  
Never
