

Orphans

Ryan Star

I will not forget you
I will not forget you now

I've walked a million miles
here with you by my side
I will not regret this
I didn't know it'd be this way

These walls that stand in front of us
Won't hold back anyone of us
Take back your nights of loneliness
Arms raised, watch out here we come
We fight for all that we believe
We stand to end this misery
You know we're not the only ones
Arms raised, watch out here we come
Watch out here we come
We're your miracle
We're your miracle

Under the darkest sky
We sing lullaby
It's getting colder out there
You're getting older everyday

This is a final call
We're gonna change it all
This is far from over
Yeah, we're breaking out today

These walls that stand in front of us
Won't hold back anyone of us
Take back your nights of loneliness
Arms raised, watch out here we come
We fight for all that we believe
We stand to end this misery
You know we're not the only ones
Arms raised, watch out here we come
Watch out here we come
We're your miracle
We're your miracle

We're standing right where we belong
This is our time to change it all
God knows, we're not the only ones
Arms raised, watch out here we come

These walls that stand in front of us
Won't hold back anyone of us
You know we're not the only ones
Arms raised, watch out here we come

Through the night
We said our last goodbye
I will not forget you
I will not forget you now
