

# Orphans

Ryan Star

I will not forget you  
I will not forget you now

I've walked a million miles  
here with you by my side  
I will not regret this  
I didn't know it'd be this way

These walls that stand in front of us  
Won't hold back anyone of us  
Take back your nights of loneliness  
Arms raised, watch out here we come  
We fight for all that we believe  
We stand to end this misery  
You know we're not the only ones  
Arms raised, watch out here we come  
Watch out here we come  
We're your miracle  
We're your miracle

Under the darkest sky  
We sing lullaby  
It's getting colder out there  
You're getting older everyday

This is a final call  
We're gonna change it all  
This is far from over  
Yeah, we're breaking out today

These walls that stand in front of us  
Won't hold back anyone of us  
Take back your nights of loneliness  
Arms raised, watch out here we come  
We fight for all that we believe  
We stand to end this misery  
You know we're not the only ones  
Arms raised, watch out here we come  
Watch out here we come  
We're your miracle  
We're your miracle

We're standing right where we belong  
This is our time to change it all  
God knows, we're not the only ones  
Arms raised, watch out here we come

These walls that stand in front of us  
Won't hold back anyone of us  
You know we're not the only ones  
Arms raised, watch out here we come

Through the night  
We said our last goodbye  
I will not forget you  
I will not forget you now
