Anything

Ryan Tedder

Baby if it's dark outside
That's because I stole the stars tonight
I put them on a priceless chain
Crazy as it sounds
Had to give you something
To show I'd do anything

Anything you want
Anything you need
Everything you are
Is everything to me
Anything you say
Anything you do
I'mma hold it down for you

Girl there's some things you can't explain
Like how you have blown me away
There's some things you just can't choose
Like how I would do, I would do, I would do
Anything for you
Do anything
Anything for you
Do anything

I know all the things people say
I know sticks and stones can break your bones
But you still feel the pain
Well all they got is jealousy
You got everything
Let the world attack
Go to war for you
I got your back

Anything you want
Anything you need
Everything you are
Is everything to me
Anything you say
Anything you do
I'mma hold it down for you

Girl there's some things you can't explain
Like how you have blown me away
There's some things you just can't choose
Like how I would do, I would do, I would do
Anything for you
Do anything
Anything for you
Do anything

Girl there's some things you can't explain
Like how you have blown me away
There's some things you just can't choose
Like how I would do, I would do, I would do
Anything for you
Do anything
Anything for you

Do anything
There's some things you can't explain
Do anything
Anything for you
How you have blown me away
Do anything
