

## Glorious Day

RZA

I thought I'd never, see the sun  
I thought it never shine again  
Then the sun came, back round again  
Since you came in my life and then  
Like there was no clouds, stand on water  
Glory came to shine again  
It's a glorious dayyyyyyyyyyyy

Yo, they say great minds think alike, we used to drink all night  
Think about things that's wrong and how to make it right  
Ice cold bottles of brass, and time flashes  
A hundred blunts passes, before the God asks  
What's the square miles of the planet, why is the axis slanted?  
How much is covered by water, how much is granite?  
Every second is the past, every second is the future  
Every second is the present, how long does it last?  
True I Master Equality, God Body be  
Flowing like the Chi energy, inside your arteries  
Hand design jewels and rhymes, like fine pottery  
Even if you went ten time platinum and struck lottery  
All the material that you gain in this world  
Wouldn't match the price of a snowflake in hell  
Bobby, did it all, boy, before you was born  
Ya'll front like ya'll thugs, but ya'll niggas be pawn

Whether million or billion, or trillion, or quadrillion  
Or quintillion, or even six sextillion  
We still be building, revealing the truth  
All the knowledge that these devils be concealing, it wont stop  
til  
Every soul is killed, then, and healed then  
Opressed by the pen, serve the clip, angel wings  
Only to be awoken by a Killa Bee sting  
Injected with the venom of truth, I defend the youth  
The black choppers, I spot 'em through the circle  
Go 'head, bust my whip, snake, my shit is gun proof  
But the darkest spot in your mind's not sunproof  
Here comes the proof, son, we present the proof
